SUMMARY

I am a Fullstack Developer with experience in building and maintaining enterprise applications using .NET (C#). I am proficient in developing backend services, business logic, and database-driven systems, as well as integrating them with frontend applications to deliver reliable and scalable solutions.

EXPERIENCE

Fullstack Developer 06/2025 - Present
PT Inovasi Mitra Sejati
Here, my role is as a full-stack developer developing a multi-financing application with a "clean architecture" and implementing microservices under the project name "360." My job here is to create the API and interface for this application across various modules such as loan origination, operating leases, and others.

Portofolio
• Penerbit Peneleh Landing Page : My team and I created a landing page for a client. My role in this project is in front end web development. I'm creating pages of testimonial, about foundations, list of foundations, book catalogs, book details, all books.

Trainee and Software Developer 12/2024 - 03/2025
PT Enigma Cipta Humanika
I completed a 4 month bootcamp, developing skills in Java Spring Boot, React JS, and React Native. I gained experience with RESTful APIs, JWT, https SQL databases, and Agile practices.

EDUCATION

Informatics Engineering 2020 - 2024
Universitas Buddhi Dharma - Bachelor's degree
During my time at college, the achievements I achieved were:
• Robotics Trash Bin With Mp3 Player, HCSR-04 Sensor Module, Arduino : My team and I created a smart robotic trash-bin using Arduino and modular sensor to open the trash can automatically and the research journal has published it.
• Thesis-Game using a camera to read hand gestures as a cursor : This project develops games using OpenCV MediaPipe by tracking palm movements for children with Down Syndrome to play and stimulate their fine motor skills.
